### Education

#### University of Central Oklahoma

2001 - 2006

Bachelor of Fine Arts, Graphic Art

#### University of Oklahoma

2000 - 2001

Bachelor's of Fine Arts, Painting

### Work history

#### HashiCorp

Staff Product Designer, Jul 2017 - Present (7+ years)

I applied my love for developer tools to build infrastructure automation software trusted by 85% of the Fortune 500. I was the first product designer for Vault, a secrets manager that helps secure major financial institutions, military secrets, and is the standard for complex engineering environments. I then moved to be the first designer for our privileged access manager called Boundary. I helped hire and scale our design team to 40+ designers and researchers, established processes and design patterns, and created our first design system spanning a suite of 7+ major products. I joined the company early as it grew rapidly to 2500+ people, went public with its IPO, and was later acquired by IBM for \$6.5 billion. in 2024.

#### thoughtbot

Sr Product Designer, Mar 2014 - Aug 2016 (2 years)

One of the biggest names in Ruby development known for their quality and commitment to open-source. I led dozens of client projects in industries from real estate to academic journals for biology, helped develop our influential Product Design Sprint as I traveled the country to kick off projects, and mentored junior designers.

#### Brightbit

Co-Founder & Design Lead, Feb 2011 - Mar 2014 (3 years)

I led design and front-end, building Ruby on Rails, Javascript and mobile software for startups. We stayed close to the open-source community and grew to be one of the leading consultants in the city.

#### The Oklahoman

Interactive Designer/ Developer, Apr 2009 - Feb 2011 (2 years)

I got into product design by scaling a design team, creating the largest site for events and business information in the region. Some talented engineers and I won a hackathon weekend, leading us to create Brightbit.

#### Element Fusion

Web Designer/Developer, Oct 2008, Apr 2009 (1 year)

I honed my process creating brands and websites for small businesses, launching more than one per week!
